EDUCATION

Web Application Development Technician · Universidad Nacional de La Matanza (2017–2025)

LANGUAGES

Spanish (Native) English (B2)

EXPERIENCE

Senior Full Stack Developer — Solutica

Sep 2024 — Present

Software factory for the pharmaceutical industry

Responsible for the evolution, maintenance, and development of enterprise applications used by companies in the pharmaceutical industry. I build new features, optimize existing processes, and solve specific requirements on production systems where stability and operational continuity are critical. I take part in technical decisions, architecture improvements, and solutions geared toward scalability, maintainability, and software quality.

.NET Core 8 C# React TypeScript SQL Server

Team Lead — Medical & Scientific Knowledge

Oct 2023 — Sep 2024

Scientific and health e-learning platform

I led a development team, combining technical leadership with hands-on development. I coordinated planning and delivery, took part in defining architecture and scalable solutions, and established development best practices and code review. I was the technical reference and point of contact for international development teams, turning business needs into concrete solutions while actively building and evolving the platforms.

Team Lead · Senior Full Stack Developer — Océano Medicina

Jan 2022 — Oct 2023

Medical and scientific publishing

I led a development team, combining technical leadership with hands-on development. I coordinated planning and delivery, took part in defining architecture and scalable solutions, and established development best practices and code review. I was the technical reference and point of contact for international development teams, turning business needs into concrete solutions while actively building and evolving the platforms.

Laravel PHP CakePHP React WordPress MySQL Linux

Semi-Senior Full Stack Developer — Antejos Negros

Mar 2021 — Jan 2022

Digital marketing agency

End-to-end development and maintenance of an e-commerce platform — backend, frontend, and infrastructure. I implemented features, optimized existing processes, and worked on integrating and deploying applications on AWS.

PHP Slim Framework JavaScript jQuery AWS MySQL

Application Support Analyst Level 2 — Frávega

Mar 2020 — Aug 2021

Retail and shipping logistics

Level 2 support on systems critical to logistics and shipping operations: incident analysis and resolution, monitoring of production processes, and automation of operational tasks with Bash and Rundeck, on Linux and Windows environments.
